Two Step Releases Corporate Focus Version 5.0

Browser-Based Release Provides Easier Access to Corporate Governance and Capitalization Information for Attorneys and Their Clients

July 13, 2005, Waltham, MA—Two Step Software, the leader in corporate governance, ownership and minute book management software, announces the release of Corporate Focus™ Version 5.0, a fully, browser-based version. Over the past decade, Corporate Focus has become the de facto standard at the nation's leading law firms based on its unique set of features designed specifically for the needs of attorneys and their clients. Version 5.0 includes many enhancements to the capabilities of the current release of Corporate Focus and then adds a new browser-based user interface to provide easier access to more attorneys and clients to their entity, ownership and minute book information. The new system configuration also simplifies the installation, administration, and support requirements. New features include more powerful capabilities in the areas of stock and option tracking, online minute books, organizational charts, task tracking, and email reminders.

"In the increasingly competitive market for legal services, the latest release of Corporate Focus is designed to address the demands of law firms and their clients who require immediate access to information and documents from anywhere at anytime," said Gary D. Levine, President and Founder of Two Step Software. "By making Corporate Focus 100% browser-based, it no longer matters whether attorneys are in the office, on the road, or at a client's office. With no software to install, everyone's attention can be totally focused on managing information and improving client communication."

Version 5.0 is now available for general release. It has been available as an upgrade for the past few months to customers enrolled in Two Step's annual support plan. Many law firms and legal departments have already begun to realize the benefits of the new release, such as the legal department of BentleyForbes LLC, a Los Angeles based commercial real estate investment company.

"Corporate Focus, Version 5.0, is one of the best written software applications I have seen to date. The documentation was easy to understand and I was able to install it without assistance. Plus, there are several enhancements in Version 5.0 that will be particularly useful to our users. Two Step Software has done a superb job of listening to its customers and adding features that will help them get their work done," said Chad Wehba, Chief Technical Officer of BentleyForbes.

The new capabilities and enhancements of Corporate Focus Version 5.0 include:

More stock and stock option tracking - Version 5.0 improves Corporate Focus' ability to track stock options and restricted stock, including automatically canceling options for employee terminations, automated stock and option splits, improved restricted stock repurchases, and many new reports.

On-screen organization charts - Subsidiary organization charts can be generated directly in the browser and can also be used to navigate to the related companies and their basic corporate information or capitalization tables.

Improved minute book management - An unlimited number of finalized minute book documents can be linked to each data record, making it easier to find the legal document back-up for the information when you need it.

All new reminder date tracking - Version 5.0 includes an improved task management system that helps users ensure that dates for filings, annual meetings, agreements, and other critical events are not missed or overlooked. The task system will even send users email reminders related to critical dates or activities.

Corporate Focus Version 5.0 is available immediately. Use of Corporate Focus Version 5.0 requires Microsoft Internet Explorer 5.5 or higher on each user's desktop. The server side of the system requires Microsoft IIS 5.0 or higher (Windows 2000 or 2003 Server) and Microsoft SQL Server 2000 (SP3 or higher). All customers enrolled in the annual support plan will receive the new version of Corporate Focus at no additional charge. Customers can sign up for instructor-led training classes that focus on the features of the new release. Existing customers should contact Two Step support when they are ready to begin the upgrade process. Law firms and legal departments interested in learning more about Corporate Focus should contact the Two Step Software sales department at (800) 252-2454 or sales@twostep.com.
